

INVESTORBRIEF · CONFIDENTIAL

Coming to Columbus, Winter 2027.

The world's first AI powered Korean Skin Lab.

Lumina Skin Lab brings together the glass skin philosophy of Korean beauty, real artificial intelligence, and on site, personalized formulation. We are building the flagship in Dublin, inside the fast growing northwest Columbus market, opening Winter 2027. This is an early opportunity to back a brand, a business model, and a technology platform that does not yet exist anywhere else.

WHY THIS, WHY NOW

The category. First of its kind. Not another med spa, but a defensible new category that blends K beauty, AI, and skincare formulated on site.

The model. Recurring by design. Membership at the core, plus signature services, proprietary formulation, and retail. Results improve the longer a member stays, so retention is built in.

The market. Affluent and underserved. Dublin and northwest Columbus are growing quickly and want premium skin health that the national chains do not deliver.

The moat. Owned technology and data. Living Formulations, the Lumina Index, on site robotic formulation, and a long term skin data asset that compounds with every visit.

The roadmap. Flagship first, then expansion. Prove the model in Dublin, then grow into a multi location regional brand.

Two ways to enter, from a lean launch to a fully integrated flagship. The detailed financial model, the capital plan, use of funds, and terms are covered in the full investor deck, available on request.
